10AN Universal PTFE Hose Kit Black Carbon Radium Engineering

Cena brutto	879,99 zł
Cena netto	715,44 zł
Numer katalogowy	USA-RAD-20-1210

Opis produktu

PTFE is the gold standard for chemically inert hose material, offering exceptional resistance to the harsh fluids commonly found in modern performance vehicles. Radium Engineering's PTFE hoses are now carbon-lined to help dissipate static charge buildup—an important feature in high-flow fueling systems. Beyond fuel, PTFE hoses are compatible with oil, transmission fluid, power steering fluid, and coolant. With virtually zero permeation, they won't emit vapors like traditional rubber hoses, making them a cleaner, safer choice. Every Radium PTFE hose has been pressure-tested in-house to 1,200 psi, though PTFE is generally rated to handle pressures exceeding 2,500 psi. These hoses are also built to perform in extreme temperatures, from -94°F to +480°F. Each hose features a seamless extruded PTFE core wrapped in a stainless steel wire braid and finished with a durable braided PET jacket. All hose ends are constructed from type-II black anodized aluminum for excellent corrosion resistance and a clean, professional finish. Hose Dimensions 20-1206: 6AN: 0.33" ID / 0.50" OD 20-1208: 8AN: 0.42" ID / 0.60" OD 20-1210: 10AN: 0.51" ID / 0.70" OD PTFE DIY KITS These kits are available in a few sizes. NOTE: Only an experienced person should assemble PTFE hoses! Each kit includes the following: Black braided PTFE hose, 14.75ft (4.5m) Black PTFE hose end, straight (x2) Black PTFE hose end, 45 degree (x2) Black PTFE hose end, 90 degree (x2) Note: The hose included in these kits is also compatible with most of the common PTFE hose-ends from other manufacturers Instruction PDF
