8-Cyl Direct Port Nitrous System EFI Gasoline (200-500Hp) 15LB Nitrous Express NX 80001EFI-15

Cena brutto	7 579,99 zł
Cena netto	6 162,59 zł
Cena poprzednia	8 965,03 zł
Dostępność	Na zamówienie
Numer katalogowy	331562182
Kod producenta	USA-NX-80001EFI-15

Opis produktu

8-Cyl Direct Port Nitrous System EFI Gasoline (200-500Hp)

This system includes:

- 8 of the NX Piranha Nozzles
- 2 NX Lightning series nitrous solenoids
- 2 NX Lightning series fuel solenoids
- Anodized aluminum distribution blocks
- 3/16 stainless hard lines
- Nickel plated fittings
- High pressure (40psi) jetting for 200-500HP
- 6AN nitrous feed lines
- High flow 6AN Y fitting
- Wide open throttle switch
- 40 Amp relays and relay harnesses
- Master arming switch
- Stainless bottle brackets and a 15lb nitrous bottle with the NX Lightning bottle valve

This system includes the latest technology and the best components available. For you tech hungry junkies we will provide some details explaining what makes this nitrous system so great. The key to maximizing nitrous horsepower is to keep the nitrous in a dense liquid form until it is injected into the engine. Sharp bends in the nitrous flow path cause the nitrous flow to become turbulent which causes gaseous bubbles to form in the flowing nitrous. Dense liquid nitrous makes more power than gaseous nitrous Period! This NX nitrous system contains the key components that ensure you are getting maximum power per pound of nitrous used. Read on and we will explain.

NX Lightning solenoids feature an improved flow path that allows nitrous / fuel to enter above the seat and exit out the bottom for flow unmatched by any other solenoid on the market. Lightning nitrous solenoids feature an integrated purge port which allows you to connect a purge valve directly to the body of the nitrous solenoid. Purging through the body of the solenoid eliminates the air pocket between the purge valve and the solenoid orifice. Lightning fuel solenoids feature a fuel bypass port which allows you to connect a small return line to the tank. This eliminates trapped air between the fuel pressure regulator and the fuel solenoid which eliminates the lean spike associated with other solenoids. Lightning Series solenoids feature CNC aluminum bodies topped with Carbon Fiber caps for the ultimate in weight savings. Nitrous Express only uses the highest quality, made in the USA components in its solenoids. Do not be fooled by low price come-ons, the solenoids are the most important component of a nitrous system. The billet aluminum Lightning bottle valve not only looks great; It is packed with features including an integrated gauge port, an integrated push port, a large .500 orifice and a direct flow path. The Lightning bottle flows great and weighs nearly one full pound less than our old style NX 45 valve.
