Adjustable Actuator for Defender or Discovery TD5

Cena brutto	829,08 zł
Cena netto	829,08 zł
Dostępność	Na zamówienie
Numer katalogowy	379175012

Opis produktu

A serviceable turbo actuator for the Land Rover Discovery and Defender TD5 Engines. With many issues of internal corrosion in the original fitment unit, you may not be aware that you are losing power. Our actuator is a simple and quick fit solution.

This actuator product has been developed as direct replacement for a failed original actuators, and is not sold as a tuning upgrade option with alternate spring/boost pressure options.

Forge Motorsport were one of the first company's in the world to design and manufacture the billet two-piece replacement aluminium turbo actuator. Originally for the Cosworth, Renault 5 GT turbo, and Lancia Integral turbos, we soon developed the largest and most diverse range of actuator replacements.

- Manufactured from 6026 grade aluminium
- Vehicle specific
- Turbo specific
- Built to order
- Machined and hand polished in the UK
- Choice of piston or diaphragm operation on most actuators
- Nomex reinforced flurosilicone diaphragms
- Laser cut stainless steel brackets (where applicable)
- Tuning and service kits available
- Made in England
- Lifetime warranty*

Please Note:

Diaphragm sealed internals are the default selection for this actuator product but customers now have the option of piston sealed internals. Unique to Forge Motorsport, this innovation offers equal performance to the diaphragm type and low maintenance due to the hard wearing nature of piston sealed valve internals.

Forge Motorsport nor any of its authorised distributors can assume any responsibility for any adverse effects resulting from the installation and tuning of this product onto a vehicle whose engine-management-system, whether factory or aftermarket, is not capable of allowing for the desired level of adjustment. While Forge Motorsport is happy to supply you with an actuator capable of holding boost beyond that of your factory unit we are in no way capable of knowing nor suggesting that your vehicle's engine or related systems are capable of supporting or surviving the stresses of such elevated boost pressure.

In The Box:
1 x FMACTD5 Actuator
1 x Forge Sticker

This actuator is built with a stock spring as standard. If you require the FMPACTUN spring tuning kit seen in the associated products below, you will need to select the Diaphragm Type 2, 049 option.
