AEM V3 Water / Methanol Injector Kit AEM 30-3315

Cena brutto	490,00 zł
Cena netto	398,37 zł
Numer katalogowy	USA-AEM-30-3315

Opis produktu

Our breakthrough injector design uses unique Swirl Generator Technology that improves atomization to deliver faster inlet temp cooling and uses less fluid to maintain inlet air cooling. We include three Swirl Generators that deliver 250cc, 500cc, and 1000cc of flow. The AEM V3 WMI injector is included in every AEM Water/Methanol injection kit and is a direct replacement/upgrade for the V2 injector in older systems. AEM's V3 WMI Injector features an innovative design that increases atomization for faster cooling using unique Swirl Generator technology, which also controls flow through a fixed injector orifice. We simplified assembly and disassembly the V3 AEM WMI injector, with all components held in place by a single clip at the rear of the injector body. Features: Unique Swirl Generator technology increases atomization for faster cooling. AEM's V3 WMI Injector features an innovative design that increases atomization for faster cooling using unique Swirl Generator technology, which also controls flow through a fixed injector orifice. SPECS Brand AEM Electric Or Mechanical Mechanical Emission Code 5 Fittings Included No Grade Type Professional Material Aluminum O-Rings Included Yes Product Type Water Methanol part Warranty 1 Year UPC 840879027018 Part Number 30-3315 This part is legal for sale or use on Emissions Controlled Vehicles, Uncontrolled (Non-Emissions Controlled) Vehicles, and Racing Use Only Vehicles because it does not affect vehicle emissions and is not covered by emissions regulations.
