Aktuator TurboSMART IWG75 Borg Warner Twin Port B1 Twin Scroll 14PSI

Cena brutto	1 184,82 zł
Cena netto	963,27 zł
Dostępność	Na zamówienie
Numer katalogowy	331430069
Kod producenta	TS-0620-2143

Opis produktu

It is all about control

The Twin Port IWG-75 uses the air-pressure differential between two sealed chambers to create a dynamic force which overcomes the mechanical spring force in the actuator. Creating a boost curve that is much more precise, and allows for a much wider boost range between minimum boost and maximum boost, than the single tier control offered by conventional actuators.

This makes the Twin Port IWG-75 ideal for traction limited applications, such as front-wheel drive or drag racing vehicles.

The IWG-75 is released to suit Borg Warner's EFR range of high performance internally wastegated turbochargers, along with a universal fit model, with more applications coming in the future.

The TurboSMART wastegate actuator range has been designed as a stronger, more reliable replacement for OEM parts. Like all TurboSMART parts, billet construction means they are stronger and more durable than a stock actuator, while TurboSMART's focus on performance means boost comes on faster and holds on longer.

The TurboSMART IWG-75 actuator range features:

- Stable boost control
- Improved boost response
- Flatter boost curve in the top end
- Interchangeable springs for a great range of boost levels

Supplied With:

Fitting Hardware, Brown/Purple 7psi Middle Spring and Brown/Pink 7psi Outer Spring (installed).
