Aktuator Turbosmart IWG75 Nissan Juke Pulsar Qashqai 14PSI

Cena brutto	1 133,00 zł
Cena netto	921,14 zł
Dostępność	Na zamówienie
Numer katalogowy	331430244
Kod producenta	TS-0615-3142

Opis produktu

The IWG-75 Internal Wastegate Actuator for the Nissan Juke and Pulsar 1.6T is a straight swap for the standard wastegate actuator, and offers significantly improved performance and durability. With an internal spring pressure of 14PSI, the IWG-75 offers more stable boost control, resulting in less wasted boost, quicker turbo spool and less boost drop off at the top of the rev range compared to the standard 'tin can' actuator. Turbosmart's internal wastegate actuators provide noticeable performance improvements throughout the rev range even in stock engines, but really come into their own when increased boost levels are involved. The IWG-75's high-quality billet aluminium construction and reinforced silicone diaphragm means that it will keep control even when you turn the boost up. The 14PSI IWG-75 for the Pulsar and Juke is suitable for tuned vehicles, or those with the factory boost control solenoid removed. Supplied With: Mounting bracket and mounting hardware, 7psi middle spring (Brown/Purple), and 7psi outer spring (Brown/Pink).
