Aktuator Turbosmart IWG75 Nissan R35 Twin Port 7psi

Cena brutto	2 788,00 zł
Cena netto	2 266,67 zł
Dostępność	Na zamówienie
Numer katalogowy	331430259
Kod producenta	TS-0615-2073

Opis produktu

Turbosmart's new Twin Port Internal Wastegate Actuators bring a new dimension of control to the R35's twin turbo setup. Whereas traditional internal wastegate actuators utilise a single pressure port to operate the actuator, Turbosmart's Twin Port actuators feature a second pressure port to a separate chamber. The pressure differential between the two sealed chambers creates a dynamic force which overcomes the spring force inside the actuator. The result is a new level of boost control that can rival an external wastegate, with a smoother and more responsive boost curve under all operating conditions and a greater range between maximum and minimum boost, compared to a conventional single port actuator. The Twin Port for the R35 GTR is a direct fit replacement for the standard wastegate actuators. The kit includes two Twin Port IWGs for the R35's two turbos, as well as a custom designed bracket and rod, meaning all the benefits of superior boost control are available without any custom fabrication or special tools.
