Opis produktu

Forge Motorsport turbo wastegate actuator for the Ford Focus RS Mk3

Produced in house with our modern CNC machinery ensures the body and stainless steel rod with fittings provides a perfectly fitting serviceable and upgradeable replacement part.

This wastegate actuator is assembled with a predetermined actuator spring suitable for or slightly above factory boost levels. The actuator can be assembled with a stronger spring upon request. Please contact us directly concerning this process and we will be happy to help with your requirement. It is designed and built with the intention of increasing the boost output of a turbocharged system. We cannot guarantee compatibility with all applications, nor the ability to increase the boost output beyond a level that is within the parameters set by the engine-management-system of the given vehicle at the time of installation, whether that system is factory or aftermarket.

Please Note:

The pressure figures listed in the drop down menu above are minimum regulated pressure figures. If you are unsure please don't hesitate to call us on 01452380999.

Diaphragm sealed internals are the default selection for this actuator product but customers now have the option of piston sealed internals. Unique to Forge Motorsport this innovation offers equal performance to the diaphragm type and low maintenance due to the hard wearing nature of piston sealed valve internals

Forge Motorsport nor any of its authorised distributors can assume any responsibility for any adverse effects resulting from the installation and tuning of this product onto a vehicle whose engine-management-system, whether factory or aftermarket, is not capable of allowing for the desired level of adjustment. While Forge Motorsport is happy to supply you with an actuator capable of holding boost beyond that of your factory unit we are in no way capable of knowing nor suggesting that your vehicle's engine or related systems are capable of supporting or surviving the stresses of such elevated boost pressure

Please Note: In line with our policy to constantly review ,revise and improve our product range, the product you receive may differ from the one advertised.
