Kod producenta	RTMG-901-0030

Opis produktu

Aluminum supercharger pulley for Mercedes 2.0 Kompressor M111, 30% lighter compared to steel. Designed to increase the pressure up to 0.4 bar, our pulley offers an increase in power up to 20 hp with a significant torque gain throughout the whole rev range. Combine this with our ECU remapping to get +40hp, compared to stock.

Unlike other pressure boosting methods, the RTMG Mercedes M111 pulley is designed to not exceed the limits of the stock supercharger, resulting in maximum reliability. No damage or extra wear to the supercharger or other components like water pump- alternator-bearings etc.

100% made of Aluminum alloy in modern CNC machines and standardization in ISO. Our design allows to install the pulley without damaging the shaft of the supercharger through the double clamping taper.

This product is made in Greece, and is manufactured and exported worldwide since 2007, by RTMG Performance, with 2 years warranty !

WARNING! This product is suitable for Mercedes Benz 2.0 M111 Kompressor engines (red top) **for superchargers with clutch-less pulley!**
