Opis produktu

ATL Saver Cell aluminum containers. To comply with FIA regulations, Saver Cells must be installed within an aluminum container, please take into account the dimensions of the container and not the saver cell when checking chassis fitment.

It is not recommended for customers to build their own aluminum containers without consulting ATL as any sizing issues may invalidate the warranty. These containers can only be ordered together with the fuel cell, if needed after delivery you must contact us prior to order to check the time to delivery.
