Opis produktu

A Pair of Forge Motorsport **atmospheric valves for Audi RS4 B9 and RS5 F5**. This set comprises a pair of our solenoid operated valves together with a custom made wiring harness, that **integrates seamlessly with the OEM electronics** and results in absolutely no fault codes, no check engine lights, and no detriment to the performance of the vehicle in any way.

They are engineered to remedy the failure issues experienced with the OEM solenoid valves when their diaphragm may rupture which would effectively result in a boost leak. Our valve uses **full billet alloy construction** with a piston based internal design that provides for **significantly improved reliability** over the OEM valves along with **lightning fast response**.

In The Box:

x2 Recirculating valves
O Rings for valve sealing
Vacuum Tubing
Solenoid
Wiring Harness
Cable Ties
Bracket and Hardware
Upgraded Springs (one for each valve)
