Atmospheric Dump Valve for Ford Focus 1.5T

Cena brutto	974,00 zł
Cena netto	974,00 zł
Dostępność	Na zamówienie
Numer katalogowy	379176141
Kod producenta	FMDV12A
Kod EAN	*5056721237947*

Opis produktu

We recommend [servicing](#) your valve every 3 years, or 20,000 miles, whichever comes sooner

This valve is for the turbocharged 1.5-litre EcoBoost petrol engine. It is recommended for any vehicle where the boost pressure has or is going to be increased by an ECU software upgrade,

Our alternative is a fully engineered solution, offering significantly improved reliability. Our valve and installation kit replaces the original unit with a pressure/vacuum operated piston valve, that still also retains the desirable OEM ECU control over valve actuation. This product has been thoroughly designed and tested with the expressed intent of offering improved valve response and maintaining ECU control while resulting in absolutely NO fault codes, NO check engine lights, and no adverse effects of any kind.

All of the necessary components and detailed instructions are included and everything is designed to make installation as simple as possible.

In the Box:
Solenoid & Bracket
Wiring Harness
Vac Tap
Blue idle spring
Forge Keyring & Sticker
4mm Vacuum Hose
Cable Ties (x10)
