Opis produktu

A set of four boost hoses and air box coupler hose for the Audi RS3 and Audi TTRS - Please note the airbox hose (centre of the kit image) does not fit the DNWA and DAZA engine codes. This hose kit includes the intercooler inlet and outlet hoses (two largest hoses seen in the kit image), throttle body hose located at feed into alloy inlet manifold elbow (straight reducer seen in the kit image), and turbo outlet hose (two smallest hoses in the kit image, one being an alternative for the facelift 8V models).

The Forge silicone hoses in this kit are Fluorosilicone lined to prevent oil vapour penetration throughout the inner hose wall. Fluorosilicone lining also renders the kit suitable to be used with either modern long-life coolants or Organic Acid Technology coolants (O.A.T.).

The use of a Fluorosilicone lining ensures that Forge silicone hoses are the clear market leader. This durable Forge Motorsport silicone hose kit has been designed to withstand pressures experienced in both tuned and remapped Audi RS3 and TTRS engines, long outlasting the original hoses. This high quality hose kit is covered by the limited lifetime Forge Motorsport warranty, keeping you on the road and ahead of the pack! This set of hoses is available in red, blue, or black finish, an added aesthetic option for this high quality hose kit.
