Balance shaft delete kit Freewheel for Audi Volkswagen VW TFSI EA113 Engines

Cena brutto	856,89 zł
Cena netto	696,66 zł
Dostępność	Na zamówienie
Numer katalogowy	331509760
Kod producenta	BOLT-TORQUE-20NM90

Opis produktu

Probably the most important upgrade for TFSI EA113 engines! BALANCE SHAFT DELETE KIT "FREEWHEEL" DID YOU CHECK YOUR BALANCE SHAFTS OR SPROKET LATELY? Do it now and DELETE them! -HEAT TREATED STEEL -SKF/TIMKEN Shielded Deep Groove Radial Ball Bearing biggest that can be fitted! LIFETIME WARRANTY Removing the rotating mass of the OE balance shaft frees up a few extra horsepower but more importantly, makes your engine rev faster. You also gain extra oil capacity and oil starvation prevention to keep your engine healthy longer. The VIS Kit removes about 2.5KG of weight from your engine. The simple weight reduction provides a small performance gain 15-20HP, but the much bigger gain comes from a decrease in rotating mass of the engine. By removing weight that your engine has to spin, it becomes easier for it to rev. This means a faster revving engine, easier rev matching, and even a few bonus horsepower The Volkswagen/Audi 2.0T FSI engine has a weak point: Its counter-rotating balance shafts wear out prematurely. This is an alternative to cut the cost of eventual shaft and oil pump replacement
