Blow Off Valve and Kit for BMW 135/235 F20

Cena brutto	1 175,08 zł
Cena netto	1 175,08 zł
Dostępność	Na zamówienie
Numer katalogowy	379174933
Kod producenta	FMDVF20A
Kod EAN	*5056721239286*

Opis produktu

We recommend [servicing](#) your valve every 3 years, or 20,000 miles, whichever comes sooner

This Blow Off, or Dump valve, is for the BMW 135/235 N55 3.0 Turbo engines 2012-2013 are PWG (Pneumatic Waste Gate) , that have the electronically controlled bypass valves. It is recommended for any vehicle where the boost pressure has been increased by an ECU software upgrade and for unmodified vehicles operating in warmer climates, as a solution to the many failures that have occurred. Unfortunately the failure doesn't always result in a check engine light as the valve can still be blown open by the boost pressure, so you may not be aware that you are losing power due to this. This prevents the diaphragm from sealing.

Our alternative is a fully engineered solution offering both significantly improved reliability. Our valve is piston based, with no diaphragm to fail, and of all aluminium construction, it replaces the original unit with a pressure/vacuum operated piston valve that still also retains the desirable OEM ECU control, over valve actuation.

In The Box:
1 x FMDVF20A Valve
1 x 3000mm of 4mm Vacuum Tube
1 x 100mm of 6mm Vacuum Tube
1 x 50mm of 6mm Vacuum Tube
1 x Solenoid, Bracket, and Screws
10 x Cable Ties
1 x Up-rated Blue Spring
1 x 8-4-8 T Piece
1 x Forge USB Instructions
1 x Forge Keyring and Sticker

If you wish to tune this product to fit the needs of your engine, please see the spring tuning kit below.
