Kod producenta	<b>FMDVAND</b>
Kod EAN	<b>*5056721239019*</b>

### Opis produktu

**We recommend [servicing](#) your valve every 3 years, or 20,000 miles, whichever comes sooner**

A fully engineered piston type, turbocharger Blow Off valve for the Nissan Juke 1.6 Turbo. This valve sounds amazing on this engine.

The design and materials used in the construction of this valve enable not only for the valve to be tuned when boost pressures have been increased but even on a standard car, will provide a fast acting and responsive valve that gives reliability over failures often associated with the original manufacturers design.

**In The Box:**  
**1 x FMDVAND Valve**  
**1 x 28mm Blanking Plug**  
**1 x Forge Sticker**
