Numer katalogowy	379174972

Opis produktu

This valve has been specifically designed for the Audi A1, Seat Leon Mk2, Skoda Yeti, & VW Scirocco 1.4 turbo. This is a full replacement atmospheric blow-off valve that **integrates seamlessly with the OEM electronics** and results in absolutely no fault codes, no check engine lights, and no detriment to the performance of the vehicle in any way. Like our many TSI replacement valve options, the valve is **fully engineered to remedy the failure issues associated with the OEM solenoid valves**.

☐ **Perfect product with superior Quality! 100% satisfied, Valve works great and much better than OEM part. Would buy it again!** ☐

Please note this valve is only compatible with models that have a turbo mounted diverter valve as standard, as found in models up to and including most 2014 models. For recent 1.4 turbo models that do not have a standard turbo mounted diverter valve please see part number [FMDV1](#).

Our valve uses full billet alloy construction with a piston based internal design that provides significantly improved reliability over the OEM valves, along with lightning fast response.

In The Box:
1 x FMDVA1TSI Valve
1 x Wiring Harness
1 x Solenoid, Bracket, and Screws
1 x 2000mm Length of 4mm Vac Hose
1 x Skoda Vacuum Tap
