Opis produktu

The Forge UNOS boost controller is a ball and spring CNC machined to aircraft grade specifications and incorporates a ratchet type top adjuster that will allow for the positive and precise adjustment that your driving style demands. The controller can be dash or engine bay mounted to suit your preference. This product is a universal component, and as such, no vehicle-specific fitting instructions can be provided.

This product is designed and built with the intent of increasing the boost output of any forced induction system. We cannot guarantee compatibility with all applications, nor the ability to increase the boost output beyond a level that is within the parameters set by the engine-management-system of the given vehicle at the time of installation, whether that system is factory or aftermarket.

Forge Motorsport nor any of it's Authorized Distributors can assume any responsibility for any adverse effects resulting from the installation and tuning of this product onto a vehicle whose engine-management-system, whether factory or aftermarket, is not capable of allowing for the desired level of adjustment.

In The Box:
1 x FMUNOS Boost Controller
1 x Upgraded Unos Spring
2 x Unos Brackets
2 x M4 x 8 Socket Cap Bolts
1 x Forge Sticker
