Opis produktu

This kit comprises of four silicone hoses complete with CNC alloy couplers and the highest quality stainless steel clamps. **These hoses will withstand greater temperatures and pressures** compared with the OEM hoses and they look fantastic. Available in your choice of red, blue, or black, and complete with our **lifetime warranty**.

The hoses replace the two intercooler hoses, throttle body hose, and the turbo outlet hose.

□ **Far superior to the original hoses. I bought these as original hoses would pop off and leak boost at joints. This product has solved this issue. Couplings are far more secure fitment and better engineered** □

□ **Exceptional Quality and delivered very fast** □

Some engines need this extra bayonet coupler. If you do need this coupler, you should purchase [FMT5TBHC](#)

You can tell by looking at the hose that goes directly onto the turbo - if it has a long coupler you do NOT need to purchase this extra coupler.

- The Forge silicone hoses in this kit have been designed to include an expensive inner liner of modified silicone known as Fluorosilicone.
- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- The use of a Fluorosilicone liner ensures that Forge silicone hoses are the clear market leader.

-
- Lifetime warranty*

*T&C's Apply

PLEASE NOTE: THE ORIGINAL O-RINGS/SEALS MUST BE RETAINED FOR USE ON THE FORGE HOSES
