Opis produktu

A set of Silicone Turbo Hoses for the Mini/Clubman/Countryman Cooper S 2007 onwards (N18 engine). The standard hoses can be restrictive and more so with earlier models that contained a noise generator. Installed on the cold side, these free-flowing hoses improve turbo response throughout the rev range. The re-enforced silicone structure will withstand greater temperatures and pressures than the original hose and is ideal for tuned engines. Available in red, blue, or black.

Please note this does not fit the N14 engine please see [FMKTR56](#)

- The Forge silicone hoses in this kit have been designed to include an expensive inner liner of modified silicone known as Fluorosilicone.
- This means the hoses are suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) or air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- The use of a Fluorosilicone liner ensures that Forge silicone hoses are the clear market leader.
- Lifetime warranty*

PLEASE NOTE: THE ORIGINAL O-RINGS/SEALS MUST BE RETAINED FOR USE ON THE FORGE HOSES
