Cena brutto	3 149,99 zł
Cena netto	2 560,97 zł
Numer katalogowy	TS-0311-1002

Opis produktu

Take full control of your turbocharged setup with the eBoost3, the ultimate evolution in boost management technology. Building on the legendary performance of the eBoost2, the eBoost3 delivers precision control, powerful features, and a state-of-the-art interface—making it the go-to solution for both street and race applications. Housed in a billet aluminum gauge body with a high-resolution full-colour LCD display and a rotating click bezel for instant, on-the-fly adjustments, the eBoost3 offers virtually limitless control over your forced induction system. Whether you're running single or twin solenoids, CO₂ systems, or electronic wastegates, the eBoost3 adapts to any setup and keeps you in command. Standard with onboard 3bar boost operating pressure (higher boost MAP sensors can be wired into supplied harness when required), the eBoost3 is a complete Boost Management System with market-leading features and state-of-the-art software, eBoost3 is the one accessory all owners of turbocharged cars should have! Easy to use yet sophisticated and technologically advanced, the eBoost3 is equally at home in a street-going vehicle as it is in a top-level racecar. Available in 60mm - Black: TS-0311-1002 60mm - Silver: TS-0311-1000

Features

- Billet Aluminium Housing
- Up to six programmable stages of boost by gear, RPM, time, or custom input
- Integrated 3bar boost pressure sensor
- Auxiliary Outputs for water spray, methanol or nitrous injection, shift lights, warning lights, and more
- Display and log critical data like RPM, Boost and Input Data
- Customisable over-boost shutdown and peak boost recall
- Logical menu navigation with quick adjustments via the rotating bezel.

The eBoost3 isn't just a boost controller—it's a complete Boost Management System. Perfect for everything from street-driven cars to high-boost drag and track builds, it combines unmatched flexibility, safety, and ease of use with market-leading performance technology. Compatible with single or twin turbo setups and ready for extreme boost levels, the Turbosmart eBoost3 is the one accessory every serious forced induction enthusiast should own.
