CANchecked ANC04 Compatible Harness Analogues Sensors

Cena brutto	249,99 zł
Cena netto	203,24 zł
Dostępność	Na zamówienie
Numer katalogowy	331547836
Kod producenta	CC22780

Opis produktu

With the ANC04 you can connect up to four analog sensors to your MFD15/28/32 with minimal effort, without having to worry about wiring or crimping the contacts. The ANC04 is directly compatible with our in-house sensors. If you follow the diagram we have defined when connecting, the sensors NTC01 (NTC temperature sensor), TCC01 (Type-K exhaust gas temperature converter), FLP01 (pressure sensor for liquid media) and BST01 (boost pressure sensor) will work out of the box. This means: Pin the pins into the mating connector provided, pin the wiring harness to the display and then assign the appropriate widgets to the display and you are ready for the road. Features: - Plug and Play with our in-house sensors - Uniform color scheme for clean cabling - No special tools required - Pins professionally crimped - 300 centimeters long for every application - Individual strands for maximum flexibility - Coated strands for lasting durability The ANC04 must be pinned to both the display and the mating connectors of the sensors.
