### Opis produktu

## Bluetooth Temperature Monitor Set for Brakes - BMB04

It has never been easier to monitor your brake performance—**no wires needed!** This Bluetooth Temperature Monitor Set is a complete, wireless system designed for racers and high-performance enthusiasts alike. With four advanced multi-channel infrared sensors, Bluetooth connectivity, and simple setup, this monitor set delivers real-time temperature data to help you fine-tune your vehicle's performance. Installation is quick, and transferring the system between vehicles takes only minutes.

### Key Features:

- **Effortless Wireless Setup:** Install and transfer between vehicles in minutes, without the hassle of wires
- **Advanced Multi-Channel Monitoring:**
  - 3 configurable temperature channels per brake, totaling 12 channels across the set
  - Adjustable refresh rate up to 10Hz for accurate, real-time insights
- **Long-Lasting, Rechargeable Battery:**
  - 250mAh battery (USB-C charged) with up to 15 hours of active track use
- **High Precision and Wide Temperature Range:**
  - Operating range: -40 to +800°C
  - Field of view: 110° standard, with an optional 55° for focused measurements on request
- **Rugged, Compact Design:**
  - Dimensions: 64.0 x 42.0 x 17.5 mm per sensor
  - Weight: 57g per sensor
  - Housing: Durable aluminum/polyamide, rated IP65 for tough environments
  - **Optional Protecting Lens:** Available to enhance durability and protection
- **Operating Temperature:** -40 to +85°C

### Compatible Apps:

- PaceLaps
- GPS Buddy (Harry's Laptimer)
- For developers, **documentation is ready to integrate this system into your own BLE application**—reach out to us for more details!

### Whats included:

- 4x BMB01

Perfect for professional racing and performance testing, this Bluetooth temperature monitor set gives you the insights you
