Carbon Air Intake System Ø76mm Wagner Tuning for VAG 2.0TSI (EA888 Gen.3)

Cena brutto	4 451,37 zł
Cena netto	3 619,00 zł
Numer katalogowy	WT-300001001

Opis produktu

Application list: VW Golf 7 GTI 2,0TSI BJ. 2013-2019 (MKB: CHHB/CHHA/DLBA/CJXE/CJXG/DNUC) VW Golf 7 R 2,0TSI BJ. 2013-2020 (MKB: CJXG/CJXC/DNUE/DJHA) Skoda Octavia RS 2,0TSI BJ. 2013-2018 (MKB: CHHB/CHHA/DLBA) Seat Leon Cupra 2,0TSI BJ. 2014-2019 (MKB: CJXE/CJXA/CJXH/DNUC/CJXC/DNUE/CJXG) **small adjustment necessary

The Wagner Tuning Air-Intake-System is a direct replacement for the factory system removing all the OEM bottlenecks. With complex 3D flow simulations, the carbon air inlet system has been optimized for the best possible flow properties in order to generate maximum performance in combination with a unique intake noise. This kit includes a specially developed sports air filter for maximum filtering effect while lowest possible back pressure. The connection diameter is Ø76mm and is adapted to the original connection diameter of the turbocharger using a silicone hose. The installation of the Wagner Tuning air inlet system guarantee superior flow whilst ensuring excellent filtration. This Air-Intake-System offers mass air flow improvements of 50% over OEM. Engine response and power output greatly improved. The Wagner Tuning Carbon Air-Intake-Systems quality design, fit and finish enhances the engine bay aesthetics. The kit comes with: 1 carbon airbox 1 Ø76mm aluminum intake pipe 1 silicon hose (black) 1 sports air filter 1 mounting material 1 installation instruction
