Carbon Fibre Engine Cover for the Fiat Abarth 500/595/695

Cena brutto	1 762,62 zł
Cena netto	1 762,62 zł
Dostępność	Na zamówienie
Numer katalogowy	379177367
Kod producenta	FMEC4
Kod EAN	*5056721223162*

Opis produktu

- **High quality 2x2 twill prepreg carbon fibre**
- **Coated with anti UV gloss gel coat**
- **Easy installation with full kit provided**
- **Located in OEM factory position**
- **Fits perfectly alongside Forge Motorsport induction Kit ([FMINDF500](#))**

The OEM engine cover designed by Fiat has an incorporated factory airbox housed within the cover itself. This meant for many people, upgrading their induction kit would result in completely removing your engine cover.

Now, with the release of our carbon fibre engine cover, FMEC4, Abarth owners can enjoy the power and performance of improved induction without having to sacrifice the aesthetic appearance of their engine bay! We designed our engine cover to fit perfectly alongside our induction kit [FMINDF500](#), purposefully using carbon fibre as the material to compliment the carbon fibre canister of the induction kit.

As this was specifically designed to fit alongside [FMINDF500](#) we do not recommend, nor can we confirm fitment in conjunction with alternative aftermarket or OEM induction kits.

3D Scan, CAD, and Print

3D scans of an Abarth 595 with [FMINDF500](#) installed were used to help develop this design. We used influence from the design of the original engine cover, so that FMEC4 will really compliment the aesthetics of the engine bay. Once the design was developed, we 3D printed a first prototype on our [Formlabs Form 3L](#).

The carbon fibre really helps to give the engine bay some character, blending in nicely with the carbon cannister of the Forge Motorsport induction kit. The high-quality carbon fibre is **prepreg 2x2 twill formed in an autoclave** from billet tooling and finished with an anti UV gloss gel coat. The Forge Motorsport **lifetime warranty** on all hardware products shows the trust we have in the quality of our products while they are being enjoyed on your pride and joy.

The kit comes complete with everything you need for installation. Fitting can be carried out in around 1 hour and includes a set of full [instructions](#).

□ **Quality product, totally transforms your engine bay and compliments the induction kit very well. Highly recommend** □

The Forge range of carbon fibre products are manufactured to the highest standards utilising the absolute best materials available. However, in certain applications and in areas of extreme temperature, this can lead to discolouration or fading (yellowing) of the carbon
