Catch Can Kit CCV for Toyota GR Corolla Fluid Lock Radium Engineering

Cena brutto	1 148,99 zł
Cena netto	934,14 zł
Numer katalogowy	USA-RAD-20-0759-FL

Opis produktu

COMPATIBILITY 2023+ GR Corolla (all models/trims/engines) Radium Engineering catch cans feature large 10AN ORB ports, a 4AN ORB drain port, 2-step oil separation baffling, and an O-ring sealed dipstick. This kit mounts using factory threads and integrate perfectly with the surrounding components. They do NOT vent to atmosphere (VTA), thus are emissions and track legal. Closed loop systems remove the oil and sludge from the PCV gasses before it is routed to the engine to be burned. A closed loop system also promotes negative crankcase pressure for optimal performance. Furthermore, closed systems prevent unwanted oil vapors from entering the cabin. The dipsticks built into the catch cans allow easy inspection of accumulated fluid. No cutting, drilling or permanent modifications are required. INCLUDES-Baffled oil catch can-GR Corolla specific mounting bracket-10AN to SAE quick connect fittings-SAE quick connect hose ends-Stainless steel hardware-Radium PCV hose
