Numer katalogowy	<b>379176287</b>

### Opis produktu

This hose kit has been designed to allow the vehicle owner to modify or colour code the visible chargecooler hoses consisting of 2x Boost hoses (3 included in kit dependant on engine model) and 2x coolant hoses. The kit replaces the hoses shown below:

These hoses have been carefully replicated to produce a product that exceeds the OEM specification (Silicone does not break down over time compared with rubber based products). The hose kit comes with all of the hose clamps necessary to complete the installation.

In this 5 hose kit you will only require 4 out of the 5 hoses, this is dependant on your engine model. Below we have detailed which hoses will fit which engine type:

- T6 -180PS kit uses Hoses #1883, #1884, #1885 & #1906
- T6 - 204PS kit uses Hoses #1883, #1884, #1885 & #1886

Available in a range of colours, simply choice between red, blue, or black using the drop down menu.

- Suitable to be used with either modern long-life coolants, Organic Acid Technology coolants (O.A.T.) but more importantly for this application, air containing oil mist.
- The construction of the hoses has been engineered to exceed that of the OEM fitments, and will enhance any engine bay both technically and aesthetically
- The use of a Fluorosilicone liner ensures that Forge silicone hoses are the clear market leader.
- Lifetime warranty\*
