Opis produktu

The Mishimoto performance aluminum radiator for the Ford F-150 is the ideal upgrade to the stock F-150 radiator. Designed and engineered to maximize cooling efficiency by up to 30%, boost engine functions and protect your car from overheating. The Mishimoto Ford F-150 Radiator includes an internal transmission cooler that functions perfectly with the Lightning's automatic transmission. Whether you use your Ford Lightning for daily driving or take it to the track, many people overlook the importance of installing an upgraded radiator in their engine. Every Mishimoto Performance Radiator is a direct OEM fit, making installation effortless, no cutting or modification is required.
