### Opis produktu

Mishimoto has released a revolutionary new radiator for the 1997–2004 Ford Mustang. The high torque generated by the Mustangs revealed a fatal flaw in the stock design, where the torquing chassis would cause the stock radiators to separate the end tanks from the cores. Utilizing a patented floating bracket system, this radiator was engineered to eliminate the issues found in the stock design while simultaneously adding cooling capacity and increasing efficiency. The new Mishimoto Mustang radiator is a direct fit and installs in about two hours with no cutting or trimming required. As with all our aluminum radiators, this Mustang radiator includes the Mishimoto Lifetime Warranty, ensuring superior product quality and craftsmanship.
