Coilover Kit for the Tesla Model 3 and Model Y

Cena brutto	8 873,47 zł
Cena netto	8 873,47 zł
Dostępność	Na zamówienie
Numer katalogowy	379177282
Kod producenta	FMSUSTES001
Kod EAN	*5056721222974*

Opis produktu

This kit lowers by around 30mm

The Forge Motorsport suspension tested in conjunction with EV Specialist [Cleevely EV](#) gives you the best balance between performance & comfort. With 32 levels of dampening adjustability the suspension kit can be set to any preference, for track or street driving, and adjust both bump and rebound at the same time

- Pillow ball top mounts on the front shocks to dial IN camber
- Manufactured from carbon steel 52mm diameter seamless tube (to JIS G3445 and DIN2393).
- A 44mm linear characteristic internal piston provides the best dampening response for the tube diameter.
- High quality mono tube shock design
- The high viscosity oil used in the damper ensures the very best and most efficient shock-absorbing action.
- The length of the shock can be adjusted, preventing the need to adjust the spring perch like on a normal coil-over, and so offering the maximum shock-absorbing travel.
- Cold drawn springs are manufactured from high strength steel (to SAE9252).
