Numer katalogowy	331140092
Kod producenta	WT-200001019

Opis produktu

Dive into the future of performance: Our Competition High Performance Intercooler Kit for the Audi RS3 8P!

Experience ultimate performance and breathtaking cooling with our Competition High Performance Intercooler Kit, tailor-made for the Audi RS3 8P. This kit sets new standards in performance and will take your driving experience to unimaginable heights. Our high performance intercooler impresses with extended core dimensions (535mm x 160mm x 110mm), resulting in a 40% larger charge air volume compared to the original cooler. The newly developed Competition high-performance intercooler core is based on the latest Tube-Fin technology and guarantees the highest cooling efficiency.

Despite its enormous performance, our intercooler is amazingly light, weighing only 6.7 kg. The CAD-developed free-form end boxes made of cast aluminum ensure the best possible internal airflow and minimize backpressure compared to the stock cooler.

Installation is as easy as can be: plug & play by replacing the OEM intercooler. Your original charge air hoses can still be used, making installation even less complicated. Our intercooler is not only designed for optimal cooling, but also for durability. The anti-corrosion coating with heat conduction properties guarantees durable, efficient cooling over long periods of time.

All of our products, including this Competition high performance intercooler kit, undergo rigorous quality monitoring. We're committed to durability and peak performance so you can conquer the roads with peace of mind.

Ready to take your vehicle to the next level? Order our Competition high-performance intercooler kit now and feel the difference every time you drive.

Your ride, our passion - Together on the road to ultimate performance.

The Competition Gen.2 Intercooler Upgrade Kit EVO 1 fits the following vehicles.

Audi TTRS 8J 250KW/340PS (2009-2014)
