Opis produktu

Maximize the performance of your BMW with our EVO 2 High Performance Intercooler Kit! Your BMW deserves the best, and our EVO 2 High Performance Intercooler Kit will ensure you get just that. Here's what you can expect: The Wagner Tuning intercooler offers an amazing 68% larger flow area compared to the factory cooler. This means more fresh air for your engine and a noticeable increase in performance. Our kit offers an amazing 90% more charge air volume than the stock cooler. This results in improved combustion and ultimately more power and efficiency. Despite its impressive size, our intercooler weighs only 8.6 kg. The end boxes of the cooler are made of cast aluminum and were optimized with the help of flow analyses in the CFD system. This guarantees optimal airflow and minimizes backpressure. Our Competition high-performance intercooler core is a high-quality tube-fin core with internal turbulators that ensures excellent cooling properties. All of our intercoolers feature an anti-corrosion coating with excellent heat conduction properties to ensure long-lasting and optimal cooling. Designed for easy installation, our kit is a plug-and-play upgrade. You can still use your original charge air hoses, making installation even easier. The EVO 2 kit is specifically designed to meet the high demands of the BMW and is ready to take your performance to the next level. We put all of our products through rigorous quality monitoring to ensure they meet the highest standards. Don't miss your chance to boost the performance of your BMW. Visit our website for more information and to order your kit. The Competition Intercooler Kit EVO 2 is also plug and play suitable for the following vehicles: BMW 114i F20 / F21 75KW/102PS (2012-2015). BMW 116i F20 / F21 100KW/136PS (2011-2015).
