### Opis produktu

Exceed all expectations with our Competition Intercooler Kit for the Audi A4 B8 Allroad 2.7 TDI!

Our high performance intercooler is the key to dramatically increasing the performance of your Audi A4 B8 Allroad 2.7 TDI. With impressive mesh dimensions of 610 mm x 440 mm x 65 mm and an intercooler volume of 17.446 liters, this intercooler offers a huge 178% larger flow area and 158% more intercooler volume compared to the factory intercooler.

Our Competition high performance mesh is a quality tube fin mesh with internal turbulators. Despite its impressive size, the intercooler weighs only 9.1 kg.

The cast aluminum end boxes were designed in the CAD system and optimized for optimal internal airflow using CFD simulations. An integrated air guide in the end box ensures uniform filling of the Competition high-performance network.

The connection diameters have been increased to Ø67 mm, which is why our kit comes with reinforced silicone hoses.

All our intercoolers have an anti-corrosion coating with excellent heat conduction properties. This ensures durable and optimal cooling and provides a noticeable increase in performance. Our kit is completely ready to install and allows for easy replacement with the factory intercooler. Our intercooler has been tested up to 6 bar and is pressure stable, making it perfect for racing. All of our products undergo strict qualitative monitoring procedures to ensure the highest standards.

Your Audi A4 B8 Allroad 2.7 TDI deserves the best! Our Competition Intercooler Kit will elevate your Audi to a new level of performance and make your driving experience more exciting.

Get ready to dominate the road with your Audi A4 B8 Allroad 2.7 TDI!
