Opis produktu

Your Audi A4 B8 Allroad deserves the best, and the best is our Wagner Tuning Competition intercooler. Experience the future of performance optimization!

Our Competition intercooler core sets new standards in terms of cooling performance and weight. At only 9.1 kg, this intercooler is a lightweight that also offers impressive cooling performance. The free-form cast aluminum end boxes were designed in CAD to ensure optimal internal airflow. This intelligent design results in efficient cooling of your charge air.

Our intercooler offers an impressive 178% more cooling surface and 158% more volume compared to the stock cooler. This allows for maximum heat transfer and increased performance. Compared to the stock intercooler, our Competition intercooler generates significantly less back pressure. This means your engine will run more efficiently and you will experience a noticeable increase in performance. Our intercooler is equipped with an anti-corrosion coating that not only protects against environmental influences, but also enables optimal heat dissipation. The result: a lasting and optimal cooling effect. Our kit is completely ready to install and 100% accurate fit. Replacing it with the stock intercooler is a breeze. With a connection diameter of 67 mm on both sides, this intercooler is perfectly matched to your Audi A4 B8 Allroad.

Experience the future of performance upgrades with the WAGNERTUNING Competition intercooler.
