Opis produktu

Boost the performance of your Audi A6 C7 3.0 TDI with our Competition Intercooler Kit. We proudly present our Wagner Tuning Competition Intercooler Kit, designed to take the performance of your Audi A6 C7 3.0 TDI to the next level. Here's what makes this kit so special: Our intercooler kit offers remarkable cooling performance with minimal weight. At just 9.1 kg, it's significantly lighter than the stock radiator, boosting your vehicle performance and efficiency. We have developed free-form end boxes made of high quality cast aluminum, which have been perfected in the CAD system. These end boxes provide optimal internal airflow for better cooling efficiency. Our Competition intercooler core not only provides 178% more cooling surface area, but also 158% more volume compared to the factory radiator. This results in a dramatic reduction in back pressure. We added a special coating that not only prevents corrosion, but also dissipates heat. This ensures durable and optimal cooling with a noticeable increase in performance. Our kit is completely ready to install and fits 100% in your vehicle. Replacement with the stock intercooler is straightforward and made easy with the included instructions. Designed for optimal performance, this kit features a 67mm intake and exhaust to ensure your supercharged air is cooled as efficiently as possible. Maximize the performance of your Audi A6 C7 3.0 TDI with our Competition intercooler kit. Visit our website for more information and to order your kit.
