### Opis produktu

Experience an impressive increase in power and optimal cooling with the Competition high performance intercooler. With intercooler core dimensions of 550mm x 445mm x 70mm and a total volume of 17,130cc, this intercooler offers a massive 134% larger flow area and an impressive 105% more charge air volume compared to the stock intercooler. The high-quality Tube Fin core with internal turbulators ensures efficient cooling and maximum performance. Despite its imposing size, the intercooler impressed with a total weight of only 9.5kg. The cast aluminum end boxes were optimized using flow analysis in the CFD system to ensure optimum airflow. The result is outstanding cooling characteristics with minimal backpressure to keep your engine running at full speed. Each of our intercoolers also features a high-quality anti-corrosion coating that ensures a long-lasting and optimal cooling effect. Installation of this completely ready-to-install kit is a breeze. Simply replace the stock intercooler with the Competition high performance intercooler - plug and play. The intercooler has been tested up to 6 bar and is absolutely pressure stable. For us, the quality of our products comes first, so all our products are subject to constant qualitative monitoring. This intercooler is also perfect for racing and will inspire you with its performance. Get your vehicle ready for the next level of performance with the Competition high performance intercooler. Get the advantage of efficient cooling and an impressive increase in performance!
