Opis produktu

Revolutionary Intercooler Upgrade Kit for Ford F-150 (2011-2014) - Performance redefined!

Increase the power and efficiency of your Ford F-150 (2011-2014) with our advanced intercooler upgrade kit. This kit sets the standard for performance enhancement and cooling.

Our high performance intercooler features impressive core dimensions (440x500x100), which equates to an astounding 35% larger flow area and 120% higher intercooler volume compared to the original intercooler. This means more air, more power and a noticeable increase in performance.

Our new Competition high-performance core ensures sufficient airflow for neighboring components such as the water cooler while remaining extremely lightweight. The end boxes of the intercooler are made of cast aluminum and have been optimized using flow analyses in the CAD system. With 50% lower backpressure, this intercooler is the perfect choice when low intake temperatures are a concern.

our intercooler also fixes the problem of water condensate in the intercooler, which occurs in all 2012 models.

Installation is straightforward and the quality of the kit will impress you. This upgrade ensures optimal cooling of the supercharged air and provides a significant increase in performance.

all our products are subject to constant qualitative monitoring to ensure the highest standards.

Prepare to take the performance of your Ford F-150 (2011-2014) to a whole new level. With the Intercooler Upgrade Kit from WAGNERTUNING, you will experience a significant increase in performance and optimal cooling of the supercharged air. Whether you're on the road or off, this kit will redefine your vehicle's performance.

Upgrade your Ford F-150 (2011-2014) with confidence. Get ready to maximize your vehicle's performance!

Part number 200001041
Kit comes with:
1 Intercooler
