Kod producenta	WT-200001086

Opis produktu

Optimize the performance of your Honda Civic FK2 with our high performance intercooler kit.

Your Honda Civic FK2 deserves the best performance, and that's exactly what our high-performance intercooler kit provides. Here's what you can expect:

With intercooler core dimensions of 650mm x 175mm x 110mm, our intercooler offers an impressive 23% larger flow area and a whopping 101% more charge air volume compared to the factory intercooler. Our new Competition high-performance core not only ensures high efficiency, but is also extremely lightweight. This improves the overall performance of your vehicle without weighing it down unnecessarily.

The end boxes of the intercooler are made of high-quality cast aluminum and have been optimized down to the smallest detail using flow analyses in the CAD system. This allows for excellent cooling characteristics with minimal back pressure. Our kit is specifically designed for racing and provides the performance and efficiency that demanding racers require. Installation is at the original mounting points and is uncomplicated thanks to the 1:1 exchange.

Our high performance intercooler kit provides optimal cooling of the supercharged air, resulting in a noticeable increase in power. Like all of our products, this kit is subject to strict quality monitoring. We do everything we can to make sure you get only the best.

Ready to boost the performance of your Honda Civic FK2? Install our high-performance intercooler kit today and experience the improvements firsthand. Visit our website for more information and ordering.

Inlet Diameter Ø65mm; Exhaust Diameter Ø70mm

Competition Intercooler Kit Honda Civic Type R FK2

OEM intercooler core:
