Numer katalogowy	331140147
Kod producenta	WT-200001049

Opis produktu

Boost the performance of your MINI Cooper S to a new level with our Competition Intercooler Kit!

Get ready to unleash the full power of your MINI Cooper S. Our Competition Intercooler Kit is designed to exceed your expectations and take your driving experience to a new level.

With impressive mesh dimensions of 550mm x 210mm x 110mm (stepped to 12.70 liters), our intercooler provides an amazing 230% larger flow area and 190% more intercooler volume compared to the factory intercooler. This means a dramatic increase in the amount of air supplied to your engine, which translates into a noticeable increase in power.

Our Competition high-performance mesh is specifically designed to ensure sufficient airflow to adjacent components such as the water cooler. Despite its impressive performance, our intercooler is lightweight, weighing just 5.0 kg. The free-form cast aluminum end boxes, developed in the CAD system, optimize internal airflow to significantly minimize backpressure.

Our intercooler features an anti-corrosion coating with excellent heat conduction properties that ensure optimal cooling and a noticeable increase in performance.

Installation is done by replacing the factory intercooler and is straightforward. You can easily upgrade your vehicle without having to make extensive modifications.

Our products are subject to strict qualitative monitoring procedures to ensure the highest standards.

Give your MINI Cooper S the performance it deserves. Enjoy increased acceleration and an impressive driving experience. Our Competition Intercooler Kit is the answer to your performance needs.

Get ready to rule the road with an optimized MINI Cooper S!
