### Opis produktu

Setting new standards: The Competition high-performance intercooler for your Mini Cooper S JCW F54.

Ready to give your Mini Cooper S JCW F54 a real performance boost? Our Competition high-performance intercooler is the solution you're looking for. Here's what you can expect:

With mesh dimensions of 590mm x 225mm x 145mm (stepped) and a generous total volume of 16.6 liters, this intercooler offers an amazing 30% larger flow area and a whopping 47% more charge air volume compared to the factory intercooler. Our Competition high-performance network is a true masterpiece of engineering. Equipped with internal turbulators, it provides top-notch cooling performance. And all this at a total weight of just 9.65 kg, despite its imposing size. The end boxes of the intercooler are made of high-quality cast aluminum and have been optimized down to the last detail using flow analyses in the CFD system. This intercooler kit was developed specifically to meet the high demands of the Mini Cooper S JCW. Our intercooler has significantly less overall backpressure than the factory intercooler. This means your engine will run more efficiently and with more power.

All of our intercoolers feature an anti-corrosion coating that also has excellent heat conduction properties. This ensures lasting and optimal cooling, resulting in a noticeable increase in performance. This kit is completely ready to install and allows an uncomplicated exchange against the factory intercooler - just plug in and go (plug and play). Designed for the highest demands of racing, this intercooler is the perfect choice for motorsports enthusiasts. Like all our products, this intercooler is subject to strict qualitative monitoring. So you can be assured of the highest quality.

Get ready to rule the road. Install our Competition high-performance intercooler today and experience the power it unleashes. For more information and to order, visit our website.

Competition Intercooler Kit for Mini Cooper S John Cooper Works (GP).

Mini Cooper S JCW F54/F56/F60 (170KW/231PS) 2015-12/2018.
