Competition Intercooler Kit Wagner Tuning for Mitsubishi EVO X

Cena brutto	4 266,87 zł
Cena netto	3 469,00 zł
Numer katalogowy	WT-200001096

Opis produktu

Maximum performance and cooling - The high-performance charge air cooler. Want to take your vehicle's performance to the next level? Our high performance intercooler is the answer. Designed for enthusiasts seeking higher performance and optimum cooling. With net dimensions of 530mm x 318mm x 100mm, this intercooler offers a 19% larger flow area and a whopping 70% more charge air volume compared to the stock cooler. This means that your vehicle will get more air, resulting in an impressive increase in performance. Despite its impressive performance, this high performance intercooler only weighs a lightweight 10.3 kg. The end boxes are made of high-quality cast aluminum and have been optimized with the help of flow analyses in the CAD system. Thanks to integrated air baffles at the inlet, the air is evenly distributed in the cooler. The connection diameters at the inlet and outlet have been expanded to a generous $\varnothing 75$ mm. The kit also contains 2 reinforced silicone hose adapters for OEM piping ($\varnothing 60$ mm). Everything together results in excellent cooling performance with minimal back pressure. This kit was developed specifically for racing. It provides optimal cooling of the supercharged air and provides a noticeable increase in power. The installation is effortless on the original mounting points. Thanks to the 100% plug & play design, you do not have to make any elaborate modifications. Our products undergo rigorous qualitative monitoring procedures to ensure they meet the highest standards. If you want to improve the performance and cooling of your vehicle, our high performance intercooler is the right choice. Feel the difference and experience an exhilarating ride with maximum performance. Get your high performance intercooler today and take your vehicle to a new level.
