Opis produktu

Boost the performance of your VW Transporter T5 with our Competition High Performance Intercooler Kit EVO 2! Your VW Transporter T5 deserves the best, and our Competition High Performance Intercooler Kit EVO 2 will make sure you get just that. Here's what you can expect: With core dimensions of 670mm x 302mm x 75mm, our intercooler offers an impressive 26% larger flow area compared to the factory cooler. This means your engine gets more air, resulting in a noticeable increase in power. Our kit offers an amazing 90% more charge air volume than the stock radiator. This results in improved combustion and ultimately more power and efficiency. Despite its impressive size, our intercooler weighs only 8.9 kg. The end boxes of the cooler are made of cast aluminum and have been optimized using CAD designs for the best possible internal airflow. This ensures optimal airflow and minimizes back pressure. Our Competition high performance intercooler core is specifically designed to provide superior cooling characteristics. All of our intercoolers feature an anti-corrosion coating with excellent heat conduction properties to ensure long-lasting and optimal cooling. Installation is done by replacing the OEM intercooler and is easy to do. No complex adjustments are required. Our kit is completely ready to install for a smooth plug-and-play experience. Whether you're on the track or simply want to get the maximum performance out of your VW Transporter T5, this kit is the right choice. We put all of our products through rigorous quality monitoring to ensure they meet the highest standards. Don't miss the chance to take the performance of your VW Transporter T5 to a new level.
