Opis produktu

The Mazda Miata is known as the ultimate driver's car. It's designed to be light and nimble, making for a rewarding driving experience. The Mishimoto 2016 Miata intake creates a sound that enhances this driving experience even more while looking amazing in your engine bay. The Miata air intake pipe is available in a polished, wrinkle black, or wrinkle red finish to match whatever style you're going for. The stock intake duct is utilized to supply cold air to the intake filter, while the CNC-machined MAF housing makes for accurate sensor readings. This ND Miata air intake features a high-flow filter to let your engine breathe, as you rip down back roads with the gas pedal mashed to the floor. As with all our 2016 Miata parts, the Mishimoto Lifetime Warranty ensures high-quality parts and performance for the life of your Miata intake. Highly aggressive intake tone under acceleration. Smooth design eliminates restrictions and improves airflow. Aluminum intake pipe includes CNC-machined MAF housing. Airbox made from aluminum for extra weight savings. Mishimoto Lifetime Warranty.
