Opis produktu

This is a full performance PRORAM induction fit for the diesel VAG with MQB chassis. Features Our performance synthetic nanofiber air filter, designed to optimise airflow. Gains on these kits are industry known to be up to 10% mapped increase with up to 25% less restriction in air flow. Designed to fit directly to the standard OEM factory air box mounting points and rubbers without the need for modification The heat shield helps maintain low intake temperatures by providing a physical barrier between the air filter and the rest of the engine bay What Does It Do? This induction kit will increase the airflow into the turbo while increasing engine noise over the restrictive factory air intake system. This kit includes everything required for the fitting of the induction kit. This kit replaces all of the factory intake pipework right back to the turbo inlet. What Will I Get?
