Dedykowany układ dolotowy RTMG Performance VW Golf Scirocco Jetta EOS 1.4 TSI EA111 Twincharger

Cena brutto	1 978,90 zł
Cena netto	1 608,86 zł
Numer katalogowy	RTMG-901-0035

Opis produktu

The new Direct Intake System is a bolt-on kit, that is mounted to the front of the vehicle without the need of extra silicone couplers and ducts. Our design allows the maximum airflow with minimum restrictions and direct feed to the turbocharger. This results in increased airflow, better throttle response and a crisp engine sound that enhances the driving experience. The use of vacuum infused carbon fiber reduces heat transfer from the hot engine bay to the cold air charge coming from the front grille, and thus performance is significantly improved. Moreover, heat soak is minimized, especially at low-speed city driving or traffic. The Kit includes: Direct Cold Air Intake Black Silicone Hose Black Metallic Connector Zip Ties Stainless Clamps Suitable for : VW : Golf, Scirocco, Jetta, EOS
