Kod producenta	USA-NX-NXD1000

Opis produktu

Diesel Nitrous System with Progressive Controller

Nitrous Express Diesel nitrous systems aren't just another plug-in chip that floods your engine with raw diesel and covers the car behind you in black smoke.

NXD1000 systems cool the exhaust and intake temperatures while boosting horsepower and torque by mounting the solenoid directly on the charge pipe!

The Maximizer nitrous controller allows you to apply nitrous flow through either boost pressure, RPM, Time, MPH (Miles Per Hour), or Throttle percentage progression. Infinitely adjustable power levels make the Nitrous Express system the most advanced, safest diesel power booster on the planet.

This system includes:

- 15300L Nitrous Solenoid
- Maximizer 6 Progressive Nitrous Controller
- 6AN High flow braided stainless line
- wide open throttle switch
- Master arming switch
- Relay and relay harness
- Max flow of 250HP
- 15Lb nitrous bottle with the Lightning 500 Valve
- Stainless steel bottle brackets
