Cena poprzednia	1 233,12 zł
Dostępność	Na zamówienie
Numer katalogowy	331556209
Kod producenta	FMICPRO-DP-089

Opis produktu

Downpipe FORD Focus ST Mk3, 2.0T, 2014 - 2018, 240 km, FWD

Downpipe is an essential element of tuning every turbocharged car. After its installation, the exhaust system is unclogged, which results in a noticeable improvement in the "bottom" of the engine, i.e. the so-called turbo hole effect disappears and the power and torque are increased. Fmic.Pro Racing Downpipe is the new quality and durability of exhaust system components. Our downpipes are made from high grade stainless steel with 1,5mm thick wall. Each component is carefully CNC made, which results in the repeatability of the finished element. Flexible connectors used in DP production have internal reinforcement, which significantly strengthens the whole construction, thanks to which it is impossible for the whole construction to be suctioned inside.

Outside diameter - 76,1mm
Thickness of the flange - 10mm

Downpipe has the following connections:
- two connections for the lambda probe

To confirm the fit of the part, please contact us and provide your car's VIN number.
