Downpipe FMIC.Pro Mini Cooper S F56 LCI JCW B48D 2019-2025

Cena brutto	949,99 zł
Cena netto	772,35 zł
Numer katalogowy	FMICPRO-DP-140
Kod EAN	5906702502697

Opis produktu

Downpipe FMIC.Pro for Mini Cooper S F56 LCI JCW B48D 2019-2025 The downpipe is an indispensable element of tuning for every turbocharged car. Its installation allows the exhaust system to be "unblocked", which directly translates into improved performance - faster turbo response, elimination of the so-called turbo lag, and an increase in power and torque, especially in the low and mid-range revs. Additionally, the downpipe gives the exhaust system a sportier sound and improves the overall operation of the turbocharging system. FMIC.Pro downpipe guarantees the highest quality and durability. The component is made of high-grade stainless steel SS304 with a wall thickness of 1.5 mm, ensuring full resistance to extreme temperatures and corrosion. CNC-cut flanges with a thickness of 10 mm guarantee perfect fitment with the turbocharger and the rest of the system, while TIG welds provide strength and an aesthetic finish. The downpipe has a restriction-free design along its entire length, allowing maximum exhaust gas flow. - Inlet diameter: 89 mm - Outlet diameter: 70 mm - Includes connection flange - Two M18x1.5 lambda sensor ports - Material: stainless steel SS304 - CNC-cut flanges, 10 mm thick - Wall thickness: 1.5 mm - TIG welded - Restriction-free construction for maximum exhaust flow Dedicated to: Mini Cooper S F56 LCI JCW B48D 2.0L 231 HP 2019-2025
