DriftShop 6 Point Harness Fluo Yellow FIA Approved 8853

Cena brutto	500,00 zł
Cena netto	406,50 zł
Numer katalogowy	DSHOP-6P-YF

Opis produktu

DriftShop 6-Point FIA Harness Specifications New feature! The side straps are equipped with our new quick-release system : two elastics ensure immediate release of both left and right straps when you unclip the central buckle of the harness. This system makes entering and exiting the vehicle much quicker and easier for the driver (and the passenger), and avoids sitting on the harness when getting into bucket seats. Our 6-point harnesses are FIA 8853-2016 (SH.059.19-T-6) certified, and compatible with Hans system which is now obligatory in numerous motorsport categories. They are equipped with an aviation quality buckle, which is both light and user-friendly, offering generous adjustment for all body sizes. They also include velcro patches to hold accessories (drink tube, radio, etc.). Made under strict quality controls, they are 5 years FIA approved and will suit even the most the demanding drivers that need to equip themselves with FIA certified items without compromising on quality. The eyebolts are included, to ensure a quick and secure installation in place of the OEM seatbelts. FIA Harness: 6-point harness with DriftShop logos Quick release system FIA 8853-2016 (SH.059.19-T-6) certified Colour: fluo yellow 2" straps (51 mm) Hans compatible Aviation quality buckles and adjusters Easily adjustable Eye bolts included Weigh: 2.6 kg 2025 batch, FIA certified until and including 2030
