Kod producenta	USA-RAD-20-0937

Opis produktu

20-0937 DUAL PUMP ADD-ON

COMPATIBILITY

*Mid 2003-2013 Chevrolet Corvette

*Compatible with vehicles after VIN 35114930 (manufactured November 2002).

OVERVIEW

This is a dual pump add-on to the fuel hanger listed above. It includes another "independent" collector specific for pump 2.

The architecture of the Corvette fuel tank is very unique. Because the opening is so small, 2 pumps cannot fit through at the same time. Each pump is sent into the tank one by one. The use of SAE quick connectors makes the installation process much easier.

Both fuel pumps outlets merge into the single 10AN ORB outlet of the CNC machined fuel hat. And because of the check valves on the pump outlets, fuel pump staging is permitted.

COMPATIBLE FUEL PUMPS

Choosing the best fuel pump is based on the expected engine power output, fuel type (gasoline, E85, etc.), and fuel pressure.

AEM 50-1000

AEM 50-1200

Walbro GSS342

Walbro F90000267

Walbro F90000274

Walbro F90000285

*Walbro F90000295 (a check valve is provided)

*Ti Automotive E5LM (a check valve is provided)

*These pumps do not feature an integrated check valve. Provided in this kit is a high flow check valve that secures to the outlet of these specific pumps.

FEATURES

- Drop-In Installation
- Collector provided to prevent Fuel Starvation
- Compatible with Various Pumps
- Brushless Fuel Pump Capable
- Fuel Pump Filter Socks Included
- Gasoline, Methanol, and E85 Compliant
- Plug and Play Installation
- Bolt-On Stainless Steel Pump Bracket

NOTE: this is also a compatible dual pump add-on for the C7 Corvette fuel hanger when released.
